$ git branch feature/advanced-feature

A     main.py
Switched to branch 'feature/advanced-feature'

Bianca@MSI MINGW64 ~/Documents/repositorio/activity4 (feature/advanced-feature)
$ git add main.py
```

Se trabaja en la rama “main”, se crea la otra rama , se cambia a esa rama y luego se agrega archivo .py

Ejercicio2:

*Examina las diferencias introducidas en cada compromiso. ¿Qué cambios fueron realizados en cada uno?

1 Commit:

En el primer commit resolví el conflicto de merge entre las ramas "main" y "feature/advanced-feature".

2 commit:

Git creó este commit cuando se combino ambas ramas manualmente y vi que contenido poner en main.py.

A screenshot of a GitHub merge pull request interface. It shows a comparison between 'base: principal' and 'comparar: característica/característica del equipo'. A green message indicates 'Posibilidad de fusión' (Merging possibility). The pull request title is 'Añadiendo cambios en feature/team-feature' and the description is 'Añadiendo cambios en feature/team-feature'. The merge button at the bottom says 'Crear una solicitud de extracción' (Create a merge pull request).

Aca se trabaja con el Github y tambien con la terminal de git. SE hace la extraccion, se hace la fusion con una rama,

A screenshot of a GitHub merge confirmation interface. It shows a message from 'parrot665' stating 'Se agrega el archivo.py colaboración con un mensaje de prueba para la colaboración en equipo. Además, se incluyen cambios.' Below it, a green message says 'Comprobando la capacidad de fusionarse automáticamente...' (Checking if merging can be performed automatically). A 'Solicitud de extracción de fusión' (Merge pull request) button is visible. The bottom section allows adding a comment.
